Pollinators

Urban Gardening

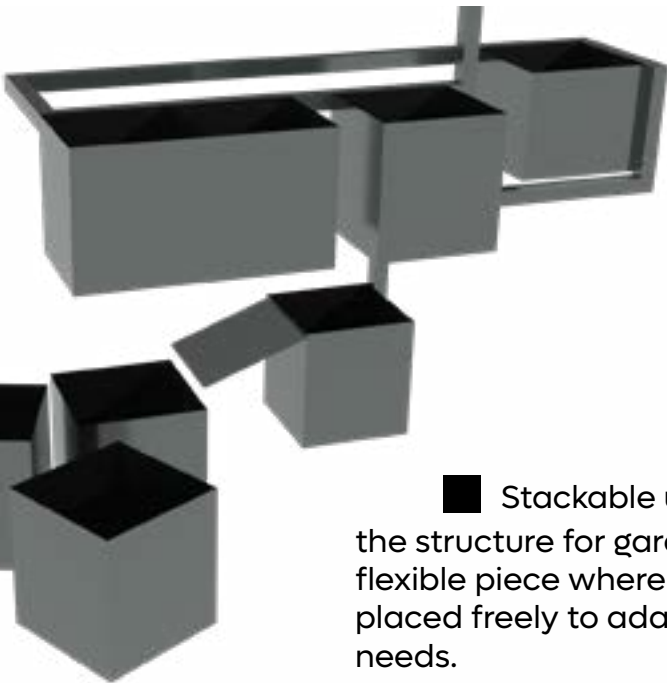

Issues regarding pollinators' population decrease are not new; due to urbanization and the use of pesticides, local bee colonies are facing a lack of flower pollen, water resources and natural habitation. With the installations, water storage and flowers are provided.

■ Relaxation area

■ Urban gardening: the sculpture support has a lid that can be opened for flora planting.

■ Stackable units: the structure for gardening is a flexible piece where boxes can be placed freely to adapt to special needs.

■ Support for hanging sculptures
